

# SYLLABUS

<i>Classification</i>	Lecture2	<i>Course No.</i>		<i>Instructor</i>	Dr. Changsu Jun
<i>Course Title</i>	Fiber laser, principles and applications				
<u><i>Course Outline</i></u> <p>Optical fiber is nowadays widely used in our daily life. Fiber laser is also expanding its applications in the areas of industry, bio-medicine and defense, due to its high performances including the compactness and beam quality.</p> <p>This lecture will cover the basics of fiber optics and fiber lasers including the up-to-date output performances. Many interesting applications will be introduced too.</p> <ul style="list-style-type: none"><li>- fiber optics</li><li>- fiber lasers</li><li>- Applications</li></ul>
